

# CD150M JCB FT4 Dri-Prime® Pump

The Godwin CD150M Dri-Prime pump with JCB TCAE-55 Final Tier 4 engine offers flow rates to 2290 USGPM and has the capability of handling solids up to 3" in diameter.

The Godwin CD150M Dri-Prime pump is able to automatically prime to 28' of suction lift from dry. Automatic or manual starting/stopping available through PrimeGuard 2 control panel. Field Smart Technology (FST) wireless remote access optional.

Indefinite dry-running is no problem due to the unique Godwin liquid bath mechanical seal design. Solids handling, dry-running, and portability make the Godwin CD150M Dri-Prime pump the perfect choice for dewatering and bypass applications.

## Features and Benefits

- Simple maintenance normally limited to checking fluid levels and filters.
- Dri-Prime (continuously operated Venturi air ejector priming device) requiring no periodic adjustment. Optional compressor clutch available.
- Extensive application flexibility handling sewage, slurries, and liquids with solids up to 3.0" in diameter.
- Dry-running high pressure liquid bath mechanical seal with high abrasion resistant solid silicon carbide faces.
- Close-coupled centrifugal pump with Dri-Prime system coupled to a diesel engine or electric motor.
- All cast iron construction (stainless steel construction option available) with cast steel impeller.
- Also available in a critically silenced unit which reduces noise levels to less than 70 dBA at 30'.
