

## Drought Relief in Hawaii

*Featuring West Maui Land*

Drought has been a problem in Hawaii for a long time and conditions have become critical within the last 3-4 years. Last summer, the Department of Water Supply issued a drought warning, imposing mandatory restrictions for Upcountry Maui consumers, and a water use advisory for the Central Maui system, urging consumers to cut use by 10 percent. Dry conditions are not only affecting Maui, but the entire state.

Lauiniupoko Irrigation Company LLC's HL5MS 6" x 4" Heidra Dri-Prime Pump moves water from a lower reservoir 1.5 miles away, that normally in summer months struggles to maintain sustainable levels. The reservoir is used for Launiupoko agricultural irrigation. The HL5MS pumps water at 700-750 gpm and 500' of head into the reservoir and directly into the distribution system. "The set up was a little tricky, but it's working," says Dave Minami, Land & Water Operations Manager for West Maui Land Company (contracted water system manager). They currently run the pump at an average of 10 hours per day, but will use it more, once permanent power is installed at the site. With high temperatures fast approaching and the demand for water continually rising, the HL5MS will ease some of the typical stress that LIC faces in the summer months.
