Raising Bar on Training

Pacific Pump & Power takes pride in having the best people in the industry! One example of this is our HDPE Fusion technicians. A lot of our competitors have in house “parking lot” fusion training courses to certify their techs. At PPP we have a Level III McElroy certified trainer on staff, to provide our technicians with a certification from the equipment manufacturer that has the highest regard in the industry. These courses are broken down into Small, Medium and Large Diameter machines and to ensure that the technicians stay current with the latest standards, McElroy requires that the courses are recertified every two years.

Not only can this trainer run courses for our crews, we can also provide this training to our clients to provide them the same level of expertise on their sites! In the last year alone, as of the end of last week, our trainer has personally certified just shy of 100 people!

Coming up in the next month, a handful of our Pacific Pump & Power crew will need to recertify their Small and Medium Diameter Operator qualifications so we will be running a combined three day course that will provide both of those certifications in one class. If you have anyone in your organization that would be interested in joining this class lets us know and we will sign them up! This specific session has not been listed on the McElroy site but full details on the courses and pricing is listed when you click on the following link.
