Lots of Equipment!

Since 2006 Pacific Pump & Power has had our yard in Campbell Industrial. We have been adding to our fleet and updating it frequently over these past 18 years. We have more equipment in our rental fleet now than we have ever had before! If you add all Dri-Prime pumps together, we have an approximate maximum capacity of 220 Million Gallons per day! That does not even include submersibles, gasoline trash pumps or the huge Xylem fleet across North America that we have access to!

If you need assistance with sewer bypassing, joint testing, HDPE or PVC pipe fusion, de-watering, generators, compressed air, dredging, pumps, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiipumps.com.
